

***CYLINDER PRESENTATION
WITH ROTARY MAINTENANCE!***

PEGASUS//S4

PEGASUS//S4

MARKET LEADING THREE YEAR WARRANTY

We build mowers that last and we back that up with an industry leading 3-year warranty which also includes the spindles and gearboxes. Our robust design, coupled with our experienced service and support network, ensures minimum downtime and maximum productivity.

SIGNIFICANT COST SAVINGS

Trimax mowers are engineered from the ground up to ensure the lowest maintenance requirement. From the famous SteadFAST Sealed Spindles to the new LocTEK Stubless Roller System - every detail has been carefully designed to ensure a superior cut and spread while keeping maintenance costs to an absolute minimum.

**MAKE THE MOVE TO TRIMAX
AND ENJOY HASSLE FREE MOWING,
LESS DOWNTIME & MORE PRODUCTIVITY.**

FACT!

IT'S COMMON TO PAY **£5,000** OR MORE PER YEAR FOR EACH CYLINDER GANG JUST FOR MAINTENANCE BUT **UNDER £700 PER YEAR** FOR A TRIMAX!

OVER ONLY 5 YEARS THAT'S A STAGGERING **£25,000 VS £3,500**

JUST IN MAINTENANCE COSTS AND THAT DOESN'T INCLUDE LABOUR INEFFICIENCIES OR MOWER DOWNTIME

ANNUAL SERVICING

Service Kit
(full set of blades, belts, nuts & bolts)

£280

Labour (2hrs @ £80)

£160

TOTAL = £440

Hydraulic Oil, filter, bottom blade x7,
bottom blade grind x7, cylinder grind x7 =

A saving of 9 days!!!

CUT HEIGHT ADJUSTMENT TIME

10-15 mins

1.5hrs

A saving of 1hr 15mins!!!

MOWERS FOR THE REAL WORLD...

**THE FUTURE OF LOCAL AUTHORITY
MOWING IS EFFICIENCY**

“It’s cutting 230 acres a week, so it’s working hard. I like the fact that it delivers great presentation, and that you get that quality of finish even when you are operating at maybe 12 or 15mph. 40 recreation grounds mowed with a quality finish using 30% less fuel and in 60% less mowing time.”

Bracknell Town Council, UK

“Maintenance is considerably less than cylinders. Each set of 7-gangs requires around 54 hours of workshop maintenance (new blades or grinding, bearings, etc.) per season on the cutter heads alone. Pegasus are greased by the operators. Blade changes are easy and they occasionally require a drive belt. The Trimax requires 70% less maintenance”.

Wolverhampton Council

Apart from the excellent finish produced by the Pegasus, a major benefit of rotary mowing from my viewpoint is the elimination of costly damage and downtime that can result when a cylinder mower hits a solid object lying on the ground. I am happy to say that our decision to go with Trimax has been vindicated further by the Pegasus’s low running costs which, during the whole of 2013, were 41 per cent lower than our equivalent sets of cylinder gangs.”

John O’Conner

“The performance was better than expected. The Trimax produces as good a finish as cylinders if mown regularly. Each mower covers more ground than a cylinder gang and the Pegasus can cope with extra growth from weather delays. We are now mowing more and more with the Trimax”.

Sandwell Metropolitan Borough
