**BE PART OF THE JOURNEY...**

f t i y in v // **TRIMAXMOWERS.CO.UK**

*Our mowers are safety tested to comply with CE Safety Standards.*

So you can be sure your mower's as safe as it can be!

*Working to keep our family safe*  
**trimax**<sup>TM</sup>  
MOWING SYSTEMS

## WHAT TESTS DO WE DO?

### → THROWN OBJECT:

Measured by surrounding the machine with specified targets, running over a standardised media (sand and stones) whilst running the mower and analysing hits in those areas. This results in thrown debris exiting the mower in a safe manner, meaning increased safety for the operator and bystanders.

### → BLADE IMPACT:

Measured by surrounding the mower with specified targets, and lowering it onto a high tensile steel bar with the blades spinning. Ensures that the blades do not fail in an unsafe manner and remain connected to the mower for increased bystander safety.

### → FINGER AND LIMB ACCESS:

Measured by probing all gaps and openings where there are moving parts with a replica arm/elbow/finger of specified dimensions. Results in unparalleled operator safety.

### → FOOT ACCESS TO CUTTING CHAMBER:

Measured by probing cutting chamber openings with a dummy foot of standard proportions. Results in increased protection for both operator and bystanders.

### → STRENGTH OF SURFACES THAT MAY BE USED AS STEPS:

Measured by loading with specific weights. Provides a safe platform from which to hook up the tractor.

# We're serious about safety.

CE Safety Standards ensure that products and services are safe, reliable and of good quality.

# Our warranty claims are the lowest in the industry - **less than 1%**

**The industry standard is over 2.5%.** That means we build our mowers tough! Because of this, we're proud to offer our 3-year warranty on all of our mowers.

## INDUSTRY LEADING 3 YEAR WARRANTY

We build mowers that last and we back that up with an industry leading 3-year warranty which also includes the spindles and gearboxes. Our robust design, coupled with our experienced service and support network, ensures minimum downtime and maximum productivity!

*"We believe our service model is one of the best in the industry"*

- FRANK BURNS | Spare Parts Manager, Trimax Mowing Systems

## → GENUINE TRIMAX PARTS

Genuine Trimax parts have been tested and approved by us, so you can be sure of a better performance and a longer life from your machine.

## → TECHNICAL SUPPORT

Dedicated to providing one of the best customer service models in the industry, you'll be sure to get what you need quickly and efficiently.

## → NEXT DAY DELIVERY

We understand the implications of downtime and what that means for your profitability, so where possible we make sure you receive your orders overnight.

# 27 years of UK History.

First exports to Great Britain started in 1992 when Trimax won 'Exporter of the Year' for two consecutive years. Having also gained trust from the royal family using the ProCut on Windsor Castle, Trimax proudly opened their first UK distribution warehouse in 1998.

Trimax continued their customer focused approach by gathering insights and driving new innovations. The brand quickly grew and by 2015 they purchased a 16,279sqft facility in Northampton, more than quadruple the size of the previous one. This central hub is where over half the Trimax range is now manufactured for distribution within the EU. Over 6,000 Trimax mowers have been sold across the EU over the past 26 years - enhancing our excellent reputation for product design, performance and reliability.

## Our Industry Partners

Proud to play a key role within the Turf Care Industry

*"During our 28 years in the UK market, we've established an extensive dealer network to support our customers throughout their Trimax journey. Our deep understanding of local conditions and valuable customer insights have enabled us to engineer products which meet the demanding conditions of the UK market."*

- RIKKI BOWN | Southern Area Sales Manager, Trimax Mowing Systems

Gathering insights and driving new innovations!

New facility in Northampton - 2015

# The Trimax Story.

INNOVATION LIVES HERE.

Although kiwifruit production was the launching pad for Trimax, rapid product development has resulted in the broad range of Trimax mowers you see today. From world-class sports turf and golf courses to royal polo fields and estates, Trimax has delivered a powerful range of commercial products and a strong history of innovation. We're proud of our extensive global expertise and dealer network which allows us to service customers as quickly as when Trimax was just a small operation.

**1983**

Pride, Procut and Ezeemow disc mowers & the Procut S1 rotary roller mowers in production.

**1989**

Warlord and Sidewinder were released.

**1992**

First exports to Great Britain & awarded 'NZ Exporter of the Year.'

**1995**

First exports to the United States.

**1997**

FlailDek out front flail mower released.

**1981**

First production of Ezeemow, Mowcraft & Mulchmasta flail mowers.

**1991**

Stealth S1 released.

**1993**

Topper S1 released & awarded 'NZ Exporter of the Year.'

**1998**

Trimax distribution warehouse opened in Great Britain.

**1985**

First exports to Australia and a dedicated research and development department established.

**1997**

Windsor Castle and surrounding grounds start using the Trimax ProCut for their maintenance.

**2001**

The Pegasus S1 is released. First Rotary roller mower in the USA.

**2005**

Set up of USA office in Georgia..

**2010**

Merlin dedicated Golf and Turf mower released.

**2013**

Set up of Australian office in Melbourne.

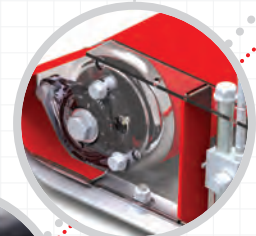

**2015**

Purchase of new facility in Northampton, UK.

**2018**

Release of LocTEK, Trimax's Stubless Roller Retention System.

**30<sup>th</sup>**

ANNIVERSARY

**2008**

Trimax Quattro Blades and X-WAM released.

**2011**

30th Anniversary of Trimax takes place.

**2014**

Trimax Snake is released. A fully dedicated sports turf and golf mower.

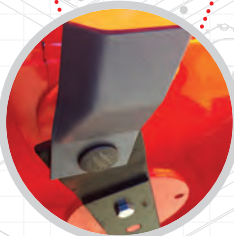

**2016**

The Stealth S3 is released. A new wing mower for sports and recreation mowing.

**2004**

Trimax Lazerbladez™ released.

"The birth of Trimax had a lot to do with modern day kiwifruit production, which was pioneered in New Zealand during the 1970s. Whilst servicing the horticulture industry, Trimax gained demand for it's machines in parks and reserves because of the product's quality of cut and strong build. We have now grown to be a market leading brand around the world and take pride in supporting our customers and dealer networks as we work together to drive new mowing innovations."

- BOB SIEVWRIGHT, Founder & Owner of Trimax Mowing Systems

INTRODUCING

# SNAKE // S2

**A mower developed specifically to meet the requirements of the golf and sports turf market.**

This trailed PTO driven rotary roller mower is suitable for compact tractors of 35hp

*Trimax's mowers are bullet proof - you definitely get what you pay for! The Snake does what it says on the tin and the build quality is great!*

- **DALE WATSON** | Norfolk Premier Golf Club, UK

*We demonstrated the Snake and it ticked every single box we wanted it to. The maintenance is minimal and its easy to use. Once we heard the cost of it, that was it, we just had to have it.*

- **CHRIS** | Ragland Parc Golf Course, UK

*Trimax Snake does a great job on our semi rough and I was even impressed with the finish it gave on our fairways!*

- **PHIL WILLIAMSON** | Fairwood Park Golf Course, UK

DEDICATED SELF-PROPELLED UNIT!

# SNAKE//S2

The Trimax SNAKE is used on some of the most prestigious golf courses around the world. The cutting system has been studied by the Sports Turf Institute of New Zealand and declared to produce a cut of equal quality to cylinder mowers yet with the versatility and reliability of our famous rotary design.

An accumulation of over 30 years of Trimax innovation, engineering and customer insight, the Snake has been designed specifically for sports turf and golf courses. We've seamlessly combined our world class cut quality and articulation capabilities and believe we've created the best sports turf rotary mower in the world. Built for agility, incredibly robust and extremely low maintenance, the Trimax Snake won't fail to impress.

***Talk to us today about the capabilities of Snake in your environment.***

**WORLD CLASS  
CUT QUALITY  
AND ARTICULATION.**

All Trimax mowers have spindles which are belt driven. Belts consume **25% less hp** than shafts and gearboxes and therefore consume less fuel.

**DESIGN AND CONSTRUCTION**

Each of the three mowing decks have spindles fitted with LazerBladez™ that have very high spindle speeds which increase the number of cuts per forward metre of travel, giving a finer cut than comparable rotary mowers. Folding for transport and easily towed behind a compact tractor, the Snake is a cost effective alternative to traditional and expensive self-propelled options. Engineered with a low centre of gravity and with transport locks, road transport of the Snake is safe and easy. The Snake uses a monocoque body construction from 5mm plate steel. A proven and simple belt drive system eliminates the chance of expensive gearbox damage. Automatic belt tensioners ensure maximum drive to the blades at all times.

Overall Length	3100mm (122")	3575mm (141")
Transport Length	2050mm (81")	3140mm (124")
Transport Height	1860mm (73")	2232mm (88")
Cut Height Range	10 - 90mm (2/5" - 3 1/2")	10 - 90mm (2/5" - 3 1/2")
No. of Blade Spindles	9	11
Approx. Weight	1280kg	1580kg
Min PTO Output	35hp	40hp
Workrate (6mph)	7 acres/hr	9 acres/hr

*The Snake won hands down. It gave us such a good quality of cut we really didn't think twice. In addition to that we really liked how quiet it was compared to other machines.*

- **STEPHEN HOPKINS** | Stand Golf Club

**→ FEATURES**

**LOCTEK**

A stubless roller bearing system for vastly improved roller retention, alignment, bearing life and minimal maintenance.

**AUTOMATIC BELT TENSIONERS**

Automatic belt tensioners eliminate the need for belt adjustments and improves drive to the spindles and blades.

**LAZERBLADEZ™**

Available in up-lift and flat formation to suit mowing requirements, the unique tilt forward design minimises hang back in tough conditions.

**ZERO TURN**

Allows continuous cutting while turning sharply for maximum productivity.

**LOW MAINTENANCE**

SteadFast sealed spindles have eliminated the tedious task of regular greasing. Snake Series 2 now also features maintenance free pivot bushes.

**QUIKLIFT**

QuikLIFT enables decks to be raised slightly for traversing driveways and paths without the need to disengage the PTO. Also aids in striping.

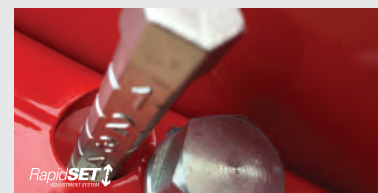

**ARTICULATION ABILITY**

With three articulating decks, the Snake has the ability to follow contours and will not scalp at 40mm height of cut.

**FULL WIDTH ROLLERS**

Full width rollers minimise scalping in undulating conditions and allow mowing over kerbsides, bunkers and potholes. Also aids in striping.

**RAPIDSET HEIGHT ADJUSTMENT**

Clearly displayed stainless steel height indicators allow the easy adjustment of cut heights without having to raise or lower the wings.

**\*OPTIONAL FEATURES**

- ✓ MULTI LIFT SYSTEM
- ✓ ANTI-WEAR SKIDS
- ✓ REMOTE UNLOCK
- ✓ HELICAL ROLLER SCRAPERS
- ✓ TOOLBAG
- ✓ SERVICE KIT

# The Snake creates **significantly more** updraft than a dedicated self-propelled unit.

- Large internal baffles provide safety, and control airflow, giving the even cut and spread Trimax is famous for.
- The shorter blade beams and higher spindle speed means each deck creates a huge amount of updraft, lifting the grass before it's cut and preventing any ugly tractor marks being left behind.
- Our LazerBladez™ system has a carefully engineered centre of gravity and a distinctive tilt-forward blade design, offering optimum cut and spread in all conditions.

*The wheels and rollers on the gangs used to flatten down the grass but the suction on the Snake cuts that problem out completely. With the Snake we can now cut the rough in 3 or 4 days, giving me an extra man for jobs that would have been left over.*

- **STEPHEN HOPKINS** | Stand Golf Club, UK

*Because we are quite high up, we get a lot of damp, misty mornings so you need a mower that cuts neatly with minimal drop. The Snake is very good in that respect compared with other mowers. We bought our first Snake four years ago and it has done us well, so it was a no-brainer when we decided there was a need for a second machine.*

- **ANDREW LORD** | Forest of Dean Golf Course, UK

*The quality of the cut we get with the Snake is beautiful. We bought it last year and have never looked back.*

- **RICHARD BIGGS** | Stoneleigh Deer Park Golf Club, UK

## Articulation like no other...

- Engineered pivot points have been incorporated into the mower design to enable movement in a multitude of directions for extreme contour following.
- Shorter blade beams allow for a shorter deck (front to rear). This provides greater articulation and allows the machine to closely hug the ground.
- Full length front and rear rollers support the mower across it's entire width, providing excellent anti-scalp protection.

*"The Snake's articulation around the greens, bunkers and on the undulating on-course is first class. There's no sinkage and no damage when turning. It's a truly fantastic machine."*

- **WAYNE BENGER** | Glynhir Golf Club, UK

*"Not many mowers could cope with this unevenness. We tried the Trimax Snake a couple of times and were really impressed with how it followed the contours. The finish is great and you get hardly any debris kicking back up."*

- **JONATHAN BULLEN** | Staddon Heights Golf Club, UK

*"Not many machines can cope well with such undulating terrain. We have some pretty sharp mounds in the semi-rough and our mower needs to articulate really well otherwise you'll get bad patches. We found the Trimax Snake was the only machine which gave us the cut quality we'd be happy to present to our members."*

- **TERRY FARKIN** | Dartmouth Golf Club, UK

Check out the video!

**PIVOT POINTS**

## For most end users, time and money spent on maintenance is often what drives a change in equipment.

The Trimax solution offers the quality of cut that is required while significantly reducing the amount of time and money spent on servicing and maintenance. For most country golf courses, two sets of blades a year will be the only cost of consumables – **that's an impressive £245!**

The Snake Series 2 contains a number of new innovations all designed to offer outstanding performance and maximum uptime. SteadFAST Sealed Spindles remove the tedious task of daily greasing and are covered by our factory backed 3 year warranty. The Auto Belt Tensioner eliminates the need for belt adjustment and improves the drive to the spindles, while the patented LocTEK Stubless Roller System vastly improves roller retention, alignment and bearing life. Operators can spend more time mowing and less time maintaining!

*The average annual maintenance of our previous dedicated ride on machine was around £400-500 but with the Snake, we are now only spending around £200 on maintenance and the cut quality is so much better and lasts much longer!*

- **DARRYL JONES** | Glynneath Golf Club, UK

*We can get round in 1.5 days with the Trimax; it used to take two. But the real time-saver is in maintenance – I would say that's been halved. You've got easy access to all the grease points on the Snake but it has so few moving parts, less greasing is required anyway.*

- **JONATHAN BULLEN** | Staddon Heights Golf Club, UK

## Forming valuable enduring partnerships with our Trimax family.

Our belief at Trimax is that our customers are like family, and like family we look out for each other. Our comprehensive range of commercial mowers have been designed with our family in mind, which means we're building machines that produce the best cut possible whilst ensuring you spend less time and money on maintenance.

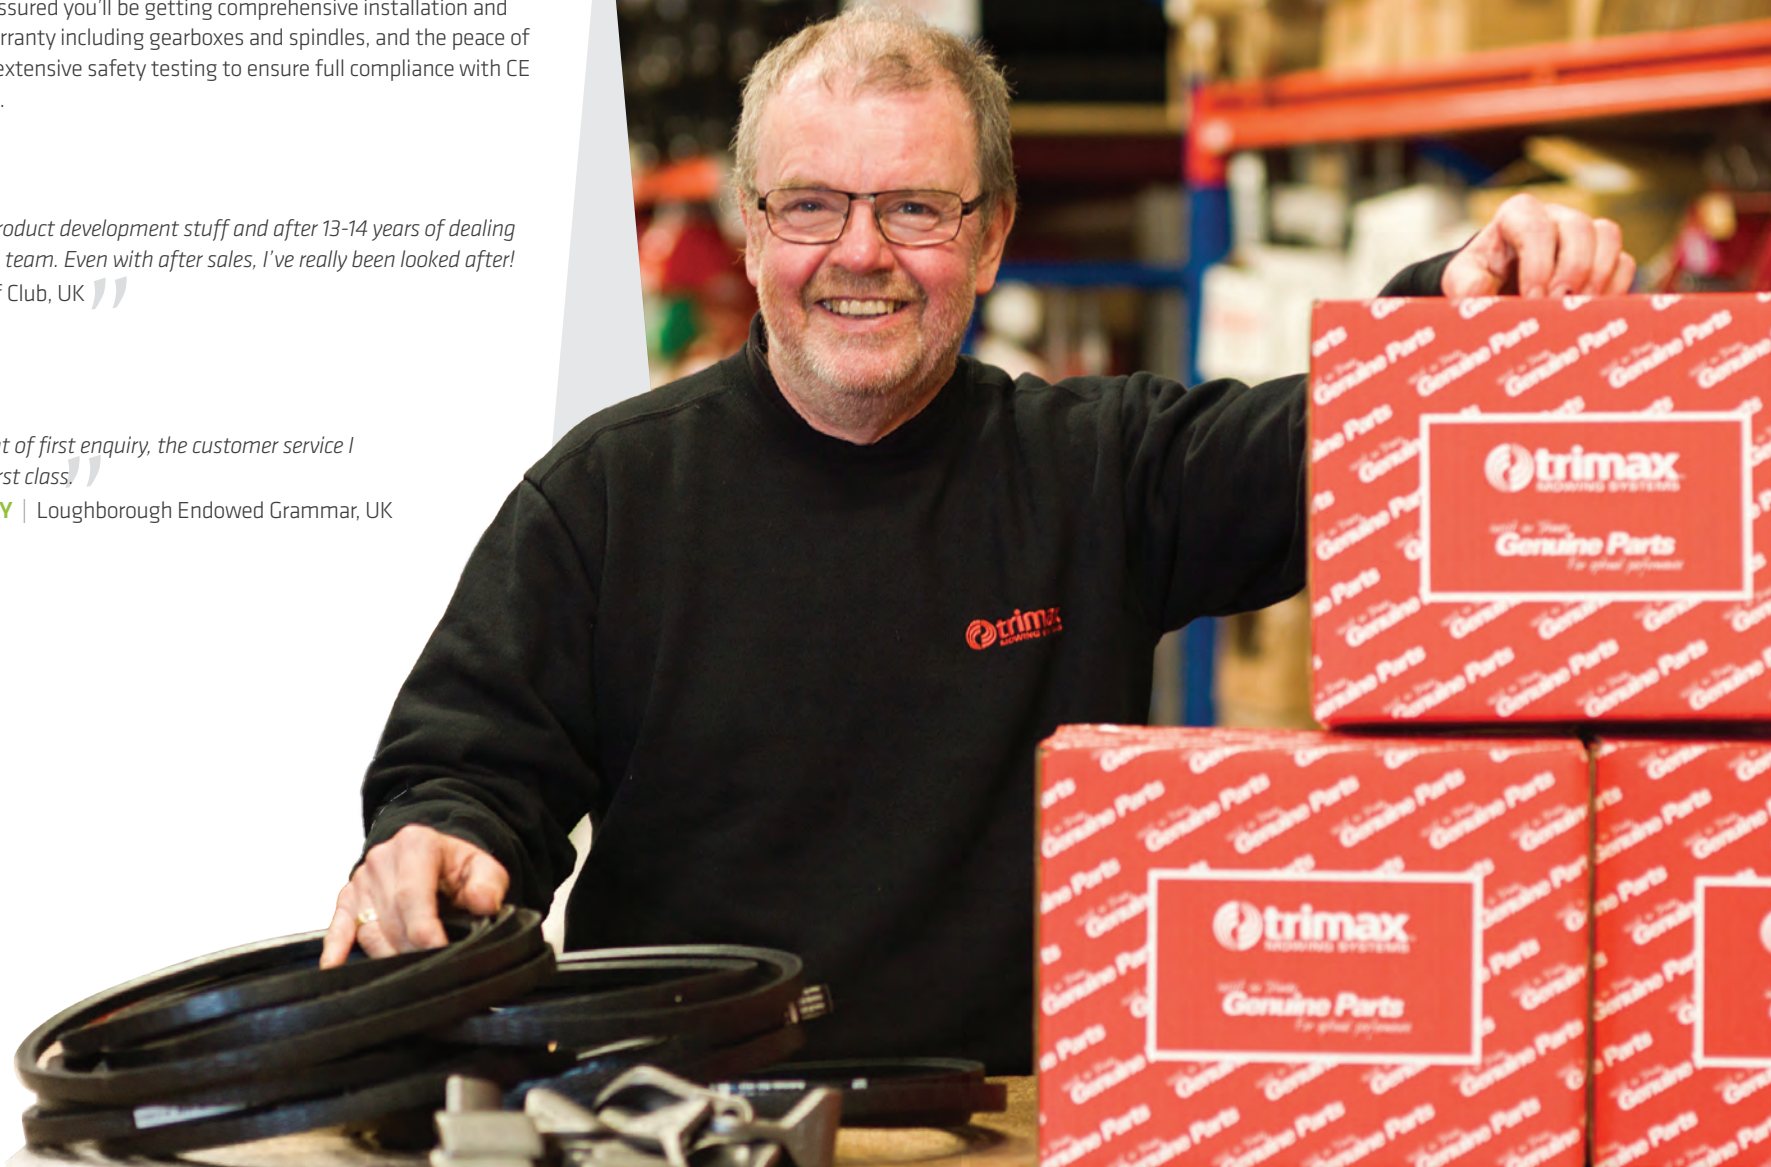

With any machine purchase, you can rest assured you'll be getting comprehensive installation and service training, a market leading 3 year warranty including gearboxes and spindles, and the peace of mind that all our mowers have undergone extensive safety testing to ensure full compliance with CE standards for safe mowing in public spaces.

*"The innovation is great! I love all of the product development stuff and after 13-14 years of dealing with the company, I really feel part of the team. Even with after sales, I've really been looked after!"*  
- **DALE WATSON** | Norfolk Premier Golf Club, UK

*"From the point of first enquiry, the customer service I received was first class."*

- **CHRIS PARRY** | Loughborough Endowed Grammar, UK

## **STRIKER**

Rotary Mower

Fastly becoming the mower of choice amongst groundsmen, the Striker is designed for compact tractors in applications where striping and presentation is key.

## **PROCUT//S4**

Rotary Mower

Engineered to withstand everyday use in the toughest commercial environments. The ProCut S4 is a multi-spindled roller mower available in four cutting widths.

## **PROCUT//FM**

Rotary Mower

This front mount version of the ProCut S4 is known for transforming paddocks into high presentation areas.

## **STEALTH//S3**

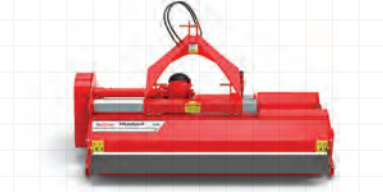

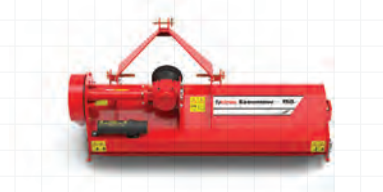

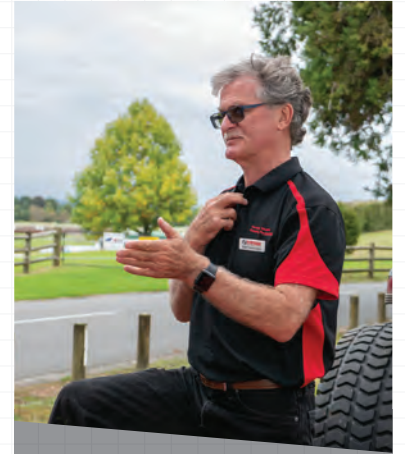

Rotary Mower

Designed to have a higher quality of cut, operate in a wider range of conditions, be safer, more robust, easier to operate than any previous Stealth.

## **SNAKE//S2**

Rotary Mower

Offering world class cut quality and articulation, this golf and sports turf mower won't fail to impress!

### **PEGASUS//S4**

Rotary Mower

Established globally as the benchmark in wide-area mowing for parks, reserves, sports fields and turf farms. There's not much the Pegasus can't handle!

### **FLAILDEK//FX**

Flail Mower

The FlailDek FX offers a high-performance alternative to standard factory-fitted rotary mowing attachments.

### **EZEEMOW//FX**

Flail Mower

This versatile yet robust mower has incredibly low maintenance requirements and is an ideal partner for small, compact tractors.

### **WARLORD//S3**

Flail Mower

This two in one, flail and mulcher mower, can deliver an exceptional cut and spread whilst also shredding branches up to 75mm in diameter.

*"Trimax is proud to be the fresh face in the golf mowing industry. Our success is a result of 40 years of innovation which challenges the status quo. Equipment should never be a barrier to your success."*
